

Product news

Description: Spillers Horse and Pony Cubes and Cool Fibre

Suitable for horses and ponies with low to medium energy requirements.

Contains magnesium known for its calming properties.

Carefully controlled levels of cereal starch and sugar will help promote positive behaviour in your horse or pony.

Cool Fiber A truly flexible fibre feed which can be used alongside a low energy feed or fed as the main feed for good doers and excitable horses and ponies.

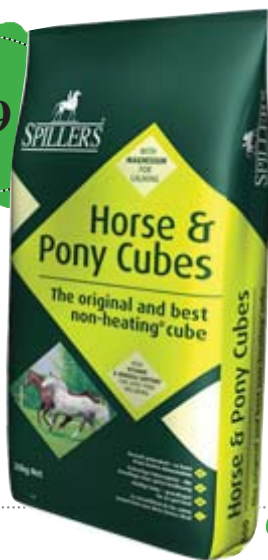

Contains a special blend of natural fibres to help keep your horse or pony eating for longer when compared to cubes and mixes

SNE reader review: "My horse was in light work over the winter and can get quite fizzy so Spillers recommended I fed him on the Horse and Pony Cubes and Hi Fibre Chaff.

It has been a success as he is a lot calmer then he would normally be at this time of year. The magnesium (known for its calming properties) contained in both the feeds has done the trick! He is in great condition with a real shine to his coat and I was at ease to know he was getting all the correct vitamins and minerals from both the feeds*"

Description: WINERGY Equilibrium Balancer

WINERGY Equilibrium Balancer will provide your horse with all his daily vitamins and minerals in a smaller ration

SNE reader review: "I have a 'good doer' mare, who gets fizzy with a slight change of feed. After a chat with the nutritionist at the Winergy Equilibrium team they kindly said I could test her on the balancer range. I have fed this product since November and have seen a significant difference! Not only has it cut down the cost of feeding, it has cut the amount of different feed. I now only feed Winergy balancer instead of three or four different components. Winergy balancer gives everything she needs. Its hasn't made her fizzy and has given a glossy coat! I like the look and feel of the forage. A must in every feed room! 5*"

Description: BEDMAX shavings are purpose made to provide a bedding that meets all the essential requirements for your horse's health and well-being in the stable.

SNE reader review: "These shavings have bigger flakes than your normal shavings so I found I used less. It was much easier to muck out and took less time. They created a hard wearing and comfortable bed for my horse." They are also dust free and which is a bonus for us both. I would highly recommend using Bedmax, it will not disappoint."

Dust free

Description: SealSkinz Ultra Grip Glove

- Using SealSkinz patented technology, Merino wool for excellent wicking and thermal performance and with grip dots on the palms, the Ultra Grip is SealSkinz' most popular glove

SNE reader review: I am one of those people who starts off doing a job with my gloves on and within 5 minutes they are abandoned in frustration.... Not now! SealSkinz have come up with the ultimate work glove. Not only are they fully waterproof but bring on the Scottish Winter weather because these gloves will keep your hands frost free no matter what. With the very cleverly designed grippy palms and fingers these gloves performed excellently even with the 'fiddliest' of jobs. For the first time my gloves remained on my hands throughout providing ultimate warmth and keeping the blisters at bay.

Description: ORIGINAL: Feed Balancer

Add Original to your horse's feed to promote:

- Coat & skin health
- Digestive health
- Topline
- Condition
- Overall health & wellbeing

SNE reader review: Feeding an elderly pony can be very difficult but Original Balancer from Blue Chip makes life very easy. I have gone from adding in many supplements to adding one mug of balancer into his food with outstanding results. Last year our elderly pony weathered the winter badly and was a fair to poor condition. This year he is in fantastic condition thanks to Blue Chip, the bag may seem expensive but we are on the third month of feeding him from the same bag.

Description: Masta Quarter Sheet Keep any horse safe and warm, this winter with the Masta Quarter Sheet with Light.

SNE reader review: "I found this quarter sheet a useful addition to my tack room. It is lightweight so is good as an extra layer for warming up but it didn't have to be removed when my mare started to work harder as some thicker fleece-lined sheets may. However I did find it quite small made so I would recommend buying a size up, a large was quite a neat fit on my 16.2 warmblood! The reflective strips across the side and tail flaps provided good visibility when hacking on the roads and for extra visibility it has a detachable red tail light with various flashing options, which I found useful even for riding round the yard at night. If you are looking for an all round, practical exercise or quarter sheet I would definitely recommend this one as it has proved very useful whether I wanted to hack or school, especially with the winter weather we have all been experiencing I think my horse definitely appreciated it.

Description: LITTLEMAX Fine Shavings offer you all the benefits of a bedding designed specifically to provide the healthiest possible environment in the stable for your horse.

SNE reader review: "We used LITTLEMAX bedding when our horse was on box rest and it made a perfect foundation for the mare to stand on as the drainage is excellent. When you open a bag the smell is somewhat reassuring as it smells a bit like antiseptic and not a waft of dust in sight which is perfect as she has a history of respiratory problems. We won't be changing back to the old bedding as I am 110 % happy with LITTLEMAX
